

It's A Fact

It's a fact there's a hundred yards
in an NFL football field

It's a fact that you might get shocked
if you swim with an electric eel

It's not a fact that gummy bears taste good
even if you like to eat them

and you think they do

Each person can decide

what they do or don't like

and if they do or don't agree with you

Cause It's a fact if you can prove it
and nobody can deny it's true

like facts about the world:

The earth is round, and the sky is blue

But if it's just something you think

and someone else might disagree

like "Wreck It Ralph" was better than "Minions"

well that's just your opinion

Facts require proof

Your opinion's up to you

It's a fact there are 31 days

in the month of March

and the month of May

It's a fact that your heart will beat

around 100,000 times each day

It's not a fact that this song is the best

even though everybody in the class agrees (right?)

It might be true for me and you,

but it's difficult to prove,

so it doesn't matter what we think

Cause it's a fact if you can prove it

And nobody can deny it's true

There are facts about numbers

like 6 minus 4 is 2

But if it's just something you think

and someone else might disagree

like "Wreck It Ralph" was better than "Minions"

well that's just your opinion

Facts require proof

Your opinion's up to you

It's a fact if you can prove it

And nobody can deny it's true

like facts about nature:

A bear is bigger than a kangaroo

But if it's just something you think

and someone else might disagree

like "Wreck It Ralph" was better than "Minions"

well that's just your opinion

Facts require proof

Your opinion's up to you
