

PLOT

The first part is called the exposition

It's where the story begins

This is where we meet the characters,

Learn about the setting, and a problem
within

And that leads to rising action

Problems begin to build

Tension rises higher and higher

Like we're climbing a hill

Then we get to the climax

When the problem is faced

And the conflict explodes in a blast

(Climax)

The biggest part of the story

When we find out what happens at last

After that comes falling action

Tension starts to ease

The excitement settles down

Like a drifting breeze

Then we reach the resolution

The story comes to a close

The conflict is settled

And we've seen how everything goes

Exposition, that's the start, the beginning

Where the characters and setting are
shown

Rising action, things start to happen and

Problems are starting to grow

Climax, the biggest part of the story

Where we find out if they win or lose

Falling action shows the reaction

Things start to settle down too

Then we reach the resolution

The story comes to a close

The conflict is settled

And we've seen how everything goes
