

PROBLEM & SOLUTION

VERSE 1

The bees were buzzing
Less and less each spring
For all kinds of reasons
That's a really sad thing
Without bees, flowers fade
Fewer fruits and veggies get made
There was no time left to waste

CHORUS 1

So people planted blooms with care
And they made more hives
for the bees to share
Now the hum is on its way
They're comin' back a little each day
See there was a problem
And they found a solution
Every problem
Needs a solution

VERSE 2

Back in the old days
It was always dark at night
People couldn't see a thing
Until 1879

CHORUS 2

Then a guy named Edison had a plan
He invented the light bulb
It spread across the land

Now cities shine and houses glow,
All because of long ago
When there was a problem
Someone found a solution
Every problem
Needs a solution

BRIDGE

A problem is something that's wrong
And needs to be fixed
A solution (a solution)
Is how people deal with it
Look for the clues that writers use
To show a set of these to you
"To solve this", "therefore", "in response"
Just to name a few...

CHORUS 3

Now you'll spot them when you read
Problems and solutions – that's a guarantee
It's a pattern you will see
In stories, books, and history
'Cause every problem needs a solution
Every problem needs a solution
