Date: _____

Show Me the Evidence!

Read the passage below. Answer the questions by citing evidence from the text.
Highlight or underline the evidence you use in the passage.

Ducks

Ducks are fascinating birds that love to swim in ponds, lakes, and rivers. They have webbed feet that help them paddle through the water easily. Ducks have feathers that keep them warm and dry, and they come in many colors like brown, white, and green. These feathered friends quack loudly to communicate with each other. Did you know that ducks eat plants, insects, and small fish? Some ducks even migrate to warmer places when it gets cold. They build nests out of grass and twigs to lay their eggs. Once the eggs hatch, cute ducklings follow their mother everywhere, learning how to swim and find food. Ducks are amazing animals that bring joy to nature lovers everywhere!

When do some ducks migrate?

What materials do ducks use to build nests?
