Construction Trucks

Construction sites need many types of trucks to complete a job. Excavators dig up dirt and make holes in the ground. Dump trucks move the dirt to different locations. Front loaders scoop and push debris out of the way. Rollers clear paths and flatten the land. Skid steers are very versatile machines and do many different jobs. Visit a construction site to see these trucks in action!

Trip to the Zoo

All of the fourth graders at our school went to the zoo last week. It was a fun field trip! First, we walked into the Africa Exhibit and saw rhinos and giraffes. The giraffes were eating leaves from the tall trees. They were so much taller than I imagined. Then we all walked to the aviary to see the birds. They were flying all around us! I loved all of the different species of birds. Finally, we gathered at the Australia exhibit to see wallabies and kookaburras. It was so wonderful.
